“ Design is not just what it looks like and feels like. Design is how it works.
-Don Norman

About Me

I am a Product Designer with over 2 years of experience, specializing in responsive user interface design, user research, and interactive prototyping. I have led various projects, including mobile applications and web platforms, which have successfully increased user satisfaction by up to 20%. My goal is to create engaging and enjoyable user experiences that combine aesthetics with functionality.

Let's try this AI
Fanya AI

This screenshot shows a mobile application for a national civics test. At the top, it displays the test title "Tes Wawasan Kebangsaan" and a timer set at 00:00:00. Below the title, there's a note about font size and a progress bar showing 32 out of 110 questions completed. The main area contains a list of four multiple-choice options: A) Badan Pekerja MPR, B) Rapat paripurna MPR, C) Komisi/Panitia Ad Hoc, and D) Rapat Fraksi-fraksi. To the right of the options is a "Navigasi Soal" (Question Navigation) grid showing question numbers from 1.A to 5.C. At the bottom are navigation buttons for "Sebelumnya" (Previous) and "Selanjutnya" (Next).

This screenshot shows a dashboard titled "Logoipsum". It includes a "Dashboard" section with statistics: Jumlah Peserta (651), Jumlah Soal (301), Soal Dikaitkan Ujian (201), and Total Skor (6). Below this is a "Persentase Tingkat Kesulitan Soal" chart showing 38.6% for "Mudah", 22.5% for "Sedang", and 30.8% for "Sulit". The "Jumlah Peserta" section lists participants by name and status (Login vs Not Login). A "Jenis Soal" table shows the distribution of question types: Matematika (1), PTS (2), IPS (1), and Minimalkan Efek Lingkungan (1).

This screenshot shows a test interface with a "PERHATIAN!" (Attention!) message: "Ujian akan dilanjutkan dalam waktu 10 detik". The background shows a list of questions and answer options, with one option highlighted in green.

This screenshot shows a test interface with a header "Tes Wawasan Kebangsaan". It displays a table of questions with columns: No., ID, Nama Soal, Pengaruh, Jawaban, A, B, C, D, E, Jumlah Benar, Jumlah Salah, Jumlah Kosong, dan Soal Matematik. Below the table are two sections of questions labeled "Soal 1" and "Soal 2", each with a list of five multiple-choice options. At the bottom are buttons for "Kembali" (Back) and "Selanjutnya" (Next).

Computer Based Test

A Computer Based Test is a standalone system that can be connected to other systems within the relevant environment. It can still function independently even if it is not connected to another system or if the other system is inactive

This screenshot shows a dashboard titled "Admin". It features a "Dashboard" section with four cards: Jumlah Peserta (651), Peserta Login (301), Peserta Belum Login (201), and Jumlah Paket Soal (6). Below this is a bar chart titled "Jumlah Peserta Keseluruhan" showing participation across 21 categories. A "Percentase Tingkat Kesulitan Soal" chart shows 38.6% for "Mudah", 22.5% for "Sedang", and 30.8% for "Sulit". The bottom section provides lists of users who have uploaded answers, not uploaded answers, logged in, and not logged in, each with their names and profile pictures.

PERFORMATRIX

PERFORMATRIX

Software designed to monitor and record employee attendance at work. This application allows employees to record their arrival and departure times. Recorded attendance data can be used to calculate salaries, manage leave, or analyze attendance patterns. Attendance applications are often integrated with broader human resource management systems (HRIS) to provide a unified solution for managing employee information.

LIVE BLOOD ANALYSIS

The Live Blood Analysis application is specifically designed to support the analysis of blood samples using a microscope. This application facilitates the analyst team or users in conducting accurate and efficient blood sample analysis and compiling detailed reports. The document is prepared for users and the development team to ensure a unified understanding of the Live Blood Analysis application. It is expected that users will gain a comprehensive picture of the application, and for the development team, this document serves as a technical reference.
