+6285641714008 | harisriski75@gmail.com | [harisriski.github.io](https://github.com/harisriski)

Junior Product Manager with 3+ years of experience across product development, system analysis, and UI/UX design. Experienced in translating business and user needs into clear product requirements, defining MVP scope and user workflows, and supporting product delivery from discovery through release. Strong cross-functional collaborator with experience working across engineering, design, QA, stakeholders, and external partners to deliver user-centered solutions.

WORK EXPERIENCE

Chickin Indonesia – Yogyakarta Sept 2025 – Present

Associate Product Manager - Project Based

Job desk:

- Contributed to the end-to-end development of Ci-Visc, an IoT-based weighing scale control system, supporting hardware–software integration and mobile UI/UX for remote monitoring and control.
- Supported product discovery and MVP definition for Ci-Touch Diesel, translating farm operational needs and business requirements into feature scopes, user stories, automation workflows, and system behaviours across HMI, ECU, sensors, and diesel-engine control.
- Coordinated with product, engineering, hardware/IoT, QA, design, and external diesel-engine partners to align requirements, resolve cross-component dependencies, and track integration risks and readiness.
- Produced and maintained product documentation—including PRDs, system flows, integration workflows, and functional requirements—to align expected product behaviour across software, hardware, and automation components.
- Supported product validation and release readiness through test scenarios, integration testing, field findings, and feature-readiness reviews across hardware and software components.

PT Komuri Indonesia Geekgarden – Yogyakarta Mar 2023 - Jul 2025

UI/UX Designer & System Analyst

Computer Based Test (CBT) & Halo Inspektur (APIP Supervision Digitalization Software)

Job desk:

- Led requirement gathering and business process analysis with stakeholders, translating operational needs and pain points into clear system requirements and proposed solutions.
- Mapped end-to-end business processes and system interactions through flowcharts and Data Flow Diagrams (DFD), helping stakeholders and development teams establish a shared understanding of system behavior.
- Identified pain points and improvement opportunities within existing workflows, then redesigned business processes and user flows to create more efficient and user-friendly solutions.
- Translated approved requirements into Functional Specification Documents (FSD) and collaborated closely with frontend and backend teams throughout development to ensure implementation aligned with business and user needs.
- Supported solution validation through usability testing and User Acceptance Testing (UAT), while facilitating regular stakeholder checkpoints and development discussions to manage feedback, requirement changes, and delivery progress.

PT Bank Rakyat Indonesia – Jakarta Aug 2021 – Feb 2022

UI/UX Designer Intern

Create system design documents for re-design Digital Saving BRI project

Job desk:

- Identified user pain points in the digital account-opening journey by analyzing issues experienced by customers and prospective customers through BRI’s internal support application (BRICARE).
- Translated identified user problems into UI/UX improvements for the BRI Digital Saving platform, focusing on creating a simpler and more intuitive account-opening experience.
- Applied the Design Thinking process to explore user problems, develop design solutions, and validate proposed improvements through usability testing.
- Conducted usability testing with 5 participants, with the proposed solution achieving a 90% usability result.

Education Level

Universitas Islam Indonesia – Bachelor of Informatics

- Top 1 the best project award in the Design Thinking subject
- 2021 MSIB Independent Campus Scholarship Program at PT Bank Rakyat Indonesia
- Cum laude Student, 3.53/4.00
- Study Program Accreditation: Excellent (A)

MENTOR EXPERIENCE

- PT Komuri Indonesia Geekgarden – Yogyakarta

May 2025

Mentored participants in the Geek UI/UX Training program, sharing practical knowledge and guidance across UI/UX fundamentals, UX research, UX design, and UI design. Supported participants in applying design concepts through hands-on assignments, providing feedback and helping them translate user problems into thoughtful design solutions.
- Universitas Teknologi Yogyakarta – Yogyakarta

Apr 2024

Mentored and reviewed a student team preparing for a UI/UX Design competition, providing guidance on applying the Design Thinking process, conducting user research, and validating design solutions through usability testing. Shared practical insights from real-world design projects to help the team strengthen their problem-solving approach and design decisions.

SKILLS

- Functional** : Product Management, IT Business Analyst, System Analyst, Data Analyst
- Technical** : UI/UX Design, Wireframe, Storyboard, UML, BPMN, SQL, MySQL, Python (Learner)
- Tools** :
 - Project Management Tools** : Jira, Trello, Monday.com, Slack, Discord, Lark, Odoo
 - Design Tools** : Figma, Adobe XD, Sketch, Maze
 - Diagram Maker** : Draw.io, Figjam, Whimsical
 - Document** : Microsoft Office, Google Docs, Spreadsheet, Slides, Canva
 - AI** : Antigravity, Firebase Studio, NotebookLM, Claude, Gemini, Chat GPT
- Documentation** : Prototype design, Mockup design, Usability Testing, Design System, Functional Specification Document (FSD), Product Requirement Document (PRD)
